

ROADsight OCSC1N

720p resolution

High-definition video at 720p resolution

IP 67

OCSC1N is dustproof and water resistant according to IP67

2-year OSRAM guarantee¹⁾

Systematic quality assurance measures underpin the premium workmanship and functionality of our products. Innovative technology and good quality really pay dividends for our customers

Expand your view and boost your safety

The extension to your existing ROADsight Reverse Camera system - designed to seamlessly integrate with the OCS700N monitor unit, this high-quality wired camera enhances your overall visibility, making reversing, parking, and maneuvering even more precise.

Delivering a 720p video feed and featuring a 120° wide-angle field of view, the additional camera provides a broader and clearer look at your surroundings. Whether you're monitoring blind spots, trailer angles, or side views, this camera helps reduce risks and enhances control behind the wheel.

Equipped with infrared LEDs, it ensures reliable night vision so you can see clearly even in low-light or nighttime conditions. Its durable, water-resistant and dustproof housing (IP67-rated) makes it ideal for a wide range of vehicles and weather conditions.

Fully compatible with 12V and 24V systems, it installs easily simply and expands your ROADsight system to provide even greater situational awareness.
