Product family datasheet

BATTERYcharge 815

Start stop safety features

Integrated safety protections deliver effortless, worry-free operation for all users

One touch button operation it provides 7 stage charging cycle for Lithium batteries and a 9-stage cycle of Lead Acid/AGM batteries

Connect and be sure that the car battery will be fully charged and automatically adjusts to long-term maintenance mode when the battery is full

6 & 12 Volt

Great for all non-commercial vehicles

Charge and maintain your vehicle battery to support longer readiness.

Meet the OSRAM BATTERYcharge 815, a versatile 5A smart charger engineered to combine efficient charging with advanced battery care for 12V batteries, including Lithium.

Designed for everyday drivers, its fully automatic 7-stage charging process optimises performance while protecting battery health. The integrated maintenance mode allows safe long-term connection and supports vehicle readiness, even after extended periods off the road.

The 815 combines performance with ease of use, featuring intuitive single-button control and clear LED indicators for real-time charging status. Extended 3m cables provide added flexibility, making battery access simple in a wide range of vehicles.

With a durable IP65-rated construction, the charger is protected against dust and water, while advanced safety systems — including reverse polarity, short circuit, and overvoltage protection — support reliable use.

Offering a balance of speed, flexibility, and protection, the OSRAM BATTERYcharge 815 is a reliable choice for everyday charging.
